Subject: Letter of Recommendation for Mr. Lê Minh Hoàng

To Whom It May Concern,

It is with great pleasure that I recommend Mr. Lê Minh Hoàng for graduate economist positions. I have had the privilege of knowing Mr. Hoàng for the past three years, during which he completed his Master of Science in Applied Economics and Data Science at the University of Oldenburg. I came to know him while teaching the courses Econometrics of Policy Evaluation and Industrial Organization, and subsequently as his supervisor during his roles as a Teaching Assistant within the Chair of Applied Microeconomics.

From an academic standpoint, Mr. Hoàng consistently demonstrated a sophisticated understanding of economic theory and econometrics. He was the top student in the courses above, which cover topics such as causal inference and demand estimation, respectively. His Master's program is relatively new but rigorous, with a strong emphasis on quantitative analysis and data science techniques, and Mr. Hoàng proved more than capable of mastering this challenging curriculum.

Beyond his academic achievements, Mr. Hoàng has been an invaluable member of our department. As a Teaching Assistant for two academic years in the courses Econometrics of Policy Evaluation, Applied Environmental Economics, and Industrial Organization he was responsible for leading tutorial sessions, including on the statistical software R, and providing academic support to students. He is a very good communicator who can explain complex concepts in a clear and accessible manner. The students found him approachable and reliable, and he handled his duties with the utmost professionalism and trustworthiness.

Moreover, he is a high-performance individual who works diligently and efficiently, often taking the initiative to solve problems before they arise.

On a personal level, Mr. Hoàng is a motivated, and highly dependable individual. His multilingual abilities, with fluency in French and English alongside a good command of German, make him particularly well-suited for an international environment. He is a great team player who would be an asset to any organization.

In summary, Mr. Hoàng possesses a rare combination of strong theoretical knowledge, advanced quantitative skills, and a dedicated work ethic. I am confident that he has the intellectual capacity, technical expertise, and personal character to excel in demanding roles as a graduate economist. I recommend him without any reservations.

Please feel to contact me if you require any further information.

Sincerely,

Cristian Huse

Recommendation Letter for Le Minh Hoàng

Dear Sir or Madam,

It is a great pleasure for me to write this letter of recommendation for Le Minh Hoàng, who is, since winter term of 2022, enrolled as a student in the master of science program *Applied Economics and Data Science* at *Carl von Ossietzky Universität Oldenburg*. In my role as both a lecturer and program manager, I had the pleasure of working with Mr. Hoàng in the “*Applied Economics*” module, where students conduct their own empirical research projects, and I know him from regular meetings and discussions as part of the mentor program. Additionally, I am currently the second supervisor for his master thesis.

Mr. Hoàng demonstrates a strong passion for advanced empirical research and continuously strives to refine his skillset. His seminar project aimed to empirically establish the relationship between water stress, land use, and electricity production. This seminar paper showcased his ability to work with geographical and remote-sensing data, as well as socio-economic data sets from various sources. He complemented these data by conducting insightful econometric analyses using *R* statistical programming language and spatial regression techniques.

In his master thesis, he is using geospatial data on the incidence of violent conflict to study empirically, whether World Bank foreign aid projects allocated to regions of increased water stress can be seen as a driver of riots, uprisings, and violence. Mr. Hoàng has mastered the computationally challenging task of data preparation thoroughly, with all steps being carefully documented in a Git repository. He is currently in the process of writing up the final results of the thesis.

As for the supervision of his thesis, I enjoyed the constructive discussions of ideas for his thesis topic, in which Mr. Hoàng has shown his ability to defend his point of view in a professional and polite manner. I was impressed by his ability to deal with problems he encountered and critically reflect upon his prior work, always being ready to learn about new methods and techniques beyond the scope of the curriculum.

In addition, Mr. Hoàng is very diligent and plans his curriculum purposefully with high ambition. In the interaction with his peers and the teaching staff, I have observed him to be a helpful, reliable, polite, and eloquent student, who does not hesitate to provide assistance to his fellow students.

Given his strong programming and data analysis skills, coupled with his eagerness to learn and embrace new challenges, I am convinced that Mr. Hoàng will be a valuable asset to any company and wish him the very best in his future pursuits.

Please contact me if you would like additional information.

Best regards,
